

V1

We didn't see the clouds coming straight our way  
Bringing a rain that loosens all that stands in it's way  
We lived in silence for days, no contest  
We let a sharp wind tear our seams to shreds

Pre-Chorus

Why are you over there?  
When I'm over here

Chorus

I've been chasing you away  
But you've been doin' just the same  
Now we're caught out here in this rain  
Hoping it all just washes away

Can't we just let this all go  
Take that trip down to Mexico  
Let this dry out under the sun  
Till we forget what we've just done

V2

There wasn't much more that we could really say  
Too much time was spent crafting out silent escapes

Pre-Chorus

How are you over there?  
When I'm over here

I've been chasing you away  
But you've been doin' just the same  
Now we're caught out here in this rain  
Hoping it all just washes away

Can't we just let this all go  
Take that trip down to Mexico  
Let this dry out under the sun  
Till we forget what we've just done

Guitar Break

How are you over there?  
When I'm over here? (vocal emphasize)

I've been chasing you away  
But you've been doin' just the same  
Now we're caught out here in this rain  
Hoping it all just washes away

Can't we just let this all go

Take that trip down to Mexico  
Let this dry out under the sun  
Till we forget what we've just done

How are you over?  
When I'm over here
